

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) An isolated polynucleotide encoding a plant polypeptide involved in a signal transduction system for brassinosteroid hormone, said polypeptide consisting of the amino acid sequence from Met at position 1 to Arg at position 1057 of SEQ ID NO: 2 ~~or an amino acid sequence with at least 80% homology to SEQ ID NO: 2,~~

wherein a plant which has a defect in said polynucleotide exhibits dwarfism, upright form, and malformation of grain hulls.

2 – 11 (canceled).

12. (previously presented) The polynucleotide according to claim 1, wherein said polynucleotide is derived from a rice plant.

13. (currently amended) The polynucleotide according to claim ~~[[2]]~~ 12, wherein said polynucleotide comprises the nucleic acid sequence from position 655 to position 3825 of SEQ ID NO: 1.

14. (currently amended) An isolated polynucleotide encoding a plant polypeptide involved in a signal transduction system for brassinosteroid hormone, said polypeptide consisting of the amino acid sequence from Met at position 1 to Arg at position 1057 of SEQ ID NO: 2 ~~or an amino acid sequence with at least 80% homology to SEQ ID NO: 2~~,

wherein a plant which has a defect in said polynucleotide is brassinosteroid insensitive.

15. (previously presented) The polynucleotide according to claim 14, wherein said polynucleotide is derived from a rice plant.

16. (previously presented) The polynucleotide according to claim 15, wherein said polynucleotide comprises the nucleic acid sequence from position 655 to position 3825 of SEQ ID NO: 1.
